

Let us design a lubricant for you

Searching for a unique lubricant to solve your difficult food grade application problems?

Need to avoid the "Dangerous to the Environment" dead tree/fish label warnings required in Europe by switching to a **zinc free** product?

Do your customers require Kosher or Halal certification?

Summit Lubricants manufactures the widest range of NSF H-1 lubricating fluids and greases available today, including our new **polyurea** thickener system which offers unsurpassed mechanical stability and water resistance performance in a high temperature lubricant.

From the freezer to the oven and everything in between, whatever the challenge -- biodegradable, chemically inert, water resistant, open gear, or synthetic -- Summit is your solution.
