

synthetic solutions

extreme temperatures
wet conditions
vacuum environments
chemical resistance
biodegradable
food grade

Whatever extreme lubrication problem you have, Summit will find your solution with a wide variety of specialty synthetic product offerings.

We have solutions for temperature extremes of -100F to 800F—PAO's, Glycols, PFPE's, and PPE's. We combine the optimum fluid with a wide variety of premium thickener options such as: Aluminum Complexes, Lithium Complexes, Calcium Sulfonate Complexes, Polyureas, and PTFE's.

Call Summit Lubricants today: (585) 344-4301
Let us design a synthetic solution for you.
